

Ecus is a leading independent consultancy, providing the best environmental support for projects and companies.

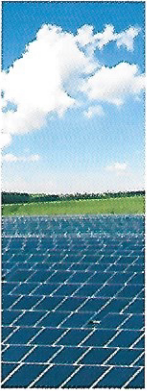

With over 28 years of trading history in multidisciplinary environmental consultancy we are recognised for our environmental focus and our breadth of expertise. Our quality, responsiveness and the value we provide differentiate us from the national engineering-focussed brands.

Our centrally located headquarters and growing number of satellite offices give us full geographical spread in the UK.

Our core services include EIA, ecology, landscape, heritage, geo-environmental consultancy, the water environment, environmental management, environmental training and sustainability. Our clients are of all sizes, covering public and private sectors. We are retained by many of our clients on long term arrangements reflecting the value and service we provide.

Ecus commitment to quality and the environment are recognised through our ISO9001 and ISO14001 accreditations.

Environmental Impact Assessment (EIA)

Ecus specialise in multidisciplinary EIA from initial scoping and feasibility through to production of an Environmental Statement. The benefits of our collaborative approach are demonstrated through our excellent success rate. We work throughout the UK undertaking assessment for major schemes including road, rail, residential, renewable energy and commercial and retail development projects.

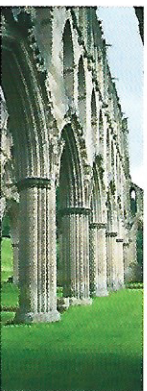

Ecology

Our specialist ecologists provide a full range of ecology services including ecological survey & evaluation, freshwater ecology, habitat management & restoration, impact assessment & monitoring, mitigation measures, BREEAM and CfSH assessment, expert witness & public inquiries, fundamental research & development, ecological policy & guidance and digital mapping & spatial modelling. We pride ourselves in working closely with our clients to ensure we meet their needs and expectations.

Landscape Architecture

We pride ourselves in the skills and design flair we bring to each landscape project and add value through joined working with our multidisciplinary in-house teams. Whether a project requires landscape design, masterplanning, tree survey, character assessment or impact assessment we provide the highest quality service to our clients and are proud of the high levels of repeat business we receive.

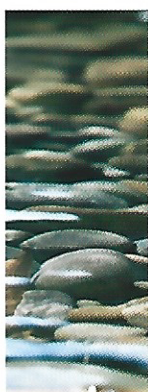

Heritage

Our highly skilled heritage team provide independent consultancy services in relation to archaeology, historic buildings and historic landscapes. We provide above and below ground heritage support to a broad range of clients including developers, landowners, planners, architects and heritage organisations. Our professional and proportionate approach ensures we provide the highest levels of service for each project we undertake.

Water Environment

If your business has any effect on, is affected by or makes use of water environments, Ecus can provide expert help and support. Our multidisciplinary team includes hydrology, fisheries, water quality and drainage experts who provide support to a wide range of clients including water regulators, industry and developers. Our facilities include an in-house lab for undertaking quality-assured biological analysis, including invertebrates, diatoms and phytoplankton.

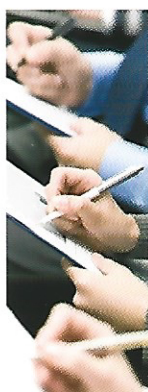

Geo-environmental Consultancy

Ecus' geo-environmental team works with clients across the UK to fulfil statutory requirements and offer advice that helps to assist with pre-planning applications, property transactions and future-proof developments against the effects of climate change. We take a strategic approach to dealing with geo-environmental challenges that our clients face, and offer practical solutions at reasonable costs in order to help speed up planning applications and transactions.

Environmental Management

Managing risk is at the centre of every organisation. Our Environmental Management team will work with you to assess and manage risk through the implementation of management systems (ISO14001, ISO9001, ISO50001 and OHSAS18001), obtaining permits and licences for operations and conducting comprehensive environmental due diligence reviews.

Training

Training plays an essential role in upskilling your workforce and ensuring that your organisation is up-to-speed with new policies, legislation and best practice.

Ecus offers a range of training services either in our training facility in Sheffield or in-house at your location. We have a suite of popular courses, including ISO14001 Internal Auditor and Implementation training, but can also develop bespoke training and have it accredited by an external organisation such as the Institute of Environmental Management and Assessment.
